

Daniel White Protest document

12/16/2010

Presented at 12-18-2010 EC meeting

Dear EC and Election Chairman,

With the recent problems in voting and my protest, I am using this "registration letter" from Ballotbin.com as my official proposal for changing the current voting procedures.

I also want to demonstrate the ease of online electronic voting.

I am formerly escalating my protest to the validity of the entire election and I am requesting this an Emergency Rule Change to the FTR Constitution. With the invalidity of the recent election, I believe it will create financial hardship for FTR. The financial hardship will be caused by FTR being mandated to invalidate the current election results because the FTR Election Procedures were not followed (Article IX, 2: There was no INSERT in the FTR Magazine and; Article IX, 7: There was no special mail-out for the election). Now FTR will need to create a new ballot and mail the new ballots to all FTR members.

Under Article XI, the Executive Committee has the authority to make this change because the change is not routine and not covered in the FTR Constitution. I state this party because the entire FTR Election hinges on Nominations being received by the Executive Director, which FTR did not and does not currently have. Therefore, all nominations are invalid according to the FTR Rule Book as well as the items listed above.

Respectfully submitted,
Daniel White
